

In the drawings:

Please add new Figure 7. New figure 7 is attached as a separate sheet, marked “New Sheet”.

REMARKS

In response to the October 31, 2005, Notice of Non-Compliant Amendment, Applicant has more clearly identified the changes to the Specification and has identified the sheet that includes new Figure 7 as a "New Sheet." The Amendment is now believed to be compliant and an indication to that effect is respectfully requested.

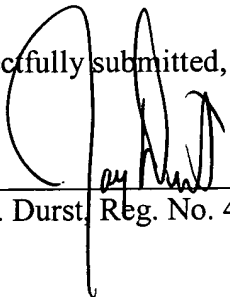

Entry of the present amendments to the specification and drawings is respectfully requested. The drawings have been amended to include a new Figure 7 which shows the structure corresponding to the limitations indicated by the Examiner as not being in the drawings of the present case, namely, the "foam insert," the "first and second compartments" and "camera with a flash." Note that new Figure 7 is the same as Figure 6 of the priority document, namely U.S. Pat. No. 6,449,431, which was incorporated by reference herein. The reference numerals of this new Figure 7 have been changed to accommodate the addition of this figure into this child application to the '431 patent. A corresponding brief description of Figure 7 and a detailed description of Figure 7 has also been added to the specification. These additions to the text of the specification are essentially identical to the corresponding text of the '431 patent, which again was expressly incorporated by reference in Applicant's priority claim. As such, no new matter has been added in the present application. Note also that the drawing sheet including new Figure 7 is labeled in the top margin as a "New Sheet." As a result, the Examiner's rejection to the drawings is believed to be overcome.

CONCLUSION

In view of the present Reply, this application is believed to be in condition for formal allowance and the same is respectfully requested. If the Examiner has any follow-up questions or concerns, he is asked to please contact the undersigned at the below number.

No fees are believed to be due in connection with this Reply. Nonetheless, the Director is authorized to direct any additional fees associated with this or any other communication, or credit any overpayment, to Deposit Account 50-1170.

Respectfully submitted,

Jay G. Durst, Reg. No. 41,723
